CONGRESSMAN NEWLANDS ON THE SITUATION.

A letter from Congressman Newlands replying to an inquiry of the editor of the *Walker Lake Bulletin* regarding the Silver party is published in the *Journal*. Mr. Newlands reiterates the opinion expressed by him in his letter to the *Washington Post*. He does not see how Nevada can identify itself with either of the old parties, and in that respect agrees with our Senators. Neither does he see "how Nevada can identify itself with the Populists so long as they remain wedded to impracticable theories and under weak leadership, and for these reasons exhibit only waning strength."

The Silver party of Nevada was organized for the specific purpose of advancing the cause of free coinage. It declared that the financial question is the paramount issue of the day, and that the recoinage of silver is of more importance to the people than the success of any political party. That was the cardinal principle of the party two years ago, and there is no evidence that the people of this State or of the whole western country have changed their minds on that subject since. The financial and industrial depression of the last year has confirmed them in the belief that they were right two years ago, and the debates in Congress on the Repeal and Seigniorage bills show that many Senators and Representatives coincide with their views. They learned by sad experience that neither of the old parties would do anything for silver. They saw their Representative in Congress, who proclaimed himself a free coinage man at home, driven by the party lash in Washington to the support of confirmed goldbugs, and they determined to rebel. They carried out their determination by severing the ties which had bound them for a generation to the Republican and Democratic parties and pledged themselves to support no man nor no party that was not unequivocally in favor of the free coinage of silver at the ratio of 16 to 1.

The People's party was organized about the time of the silver movement in Nevada. It declared for free coinage and in that respect is in perfect accord with the Silver party. It incorporated several issues in its platform, some of which are indorsed by the silver men and some of which are not. Doubtless at its next national convention the impracticable issues will be eliminated, but in any event, so far as the cardinal principle of the Silver party is concerned, it is in line with the People's party, which, therefore, meets with much favor among the people of Nevada. While it may have had weak leaders, strong men are daily entering its ranks, and it remains to be seen whether or not its strength is waning. It has placed a ticket in the field in Alabama and will have a ticket in the field in Oregon in a few days. It held its own in Nebraska and Colorado in the recent election and developed unprecedented strength in Virginia. It is with the Silver party on the main issue, and for that reason deserves the good will of every voter in Nevada who places the prosperity of the State above the success of any party.

Eliminate a few of the objectionable planks incorporated in the Omaha platform and every man can indorse the rest. Its leaders indicate a disposition to make the fight on the financial question only in the next campaign and leave the "impracticable" theories for future consideration. In Nevada the Populists are faithful allies of the Silver party, and in Congress they have fought gallantly for free coinage. They stood shoulder to shoulder with our Senators and Representatives in their fight with the gold ring, and the only regret expressed by the silver men is that there was not more of them in the Senate and House of Representatives.

OREGON POPULISTS.

The Oregon Populists are to meet in State convention at Oregon City tomorrow to nominate a State ticket. It is believed that Nathan Pierce, who was chosen Presidential Elector on the Populist ticket in 1892, will be nominated for Governor, and that Governor Penoyer will be endorsed for United States Senator to succeed Joseph N. Dolph whose term will expire next March.

The Silver men of Oregon are determined to elect a Silver man to succeed Dolph who by his adherence to the gold trust has made himself obnoxious to the farmers, business men and workmen generally of the State. He is supported, however, by the Portland ring and the railroad and navigation companies.

The Silver Republicans and Democrats are favorably disposed toward the Populists and it is probable that a ticket will be nominated that will be satisfactory to every Silver man. Senator Dolph, certainly deserves defeat for his opposition to silver. He has followed the leadership of Sherman faithfully and with voice and vote endorsed every proposition advanced by the Wall street combination.

The British Parliament convened yesterday. The Queen's speech and the addresses of the new members constituting Lord Roseberry's cabinet were to the effect no change of policy from that begun under the Gladstone ministry will be attempted by the new government.

THE ENGLISH LANGUAGE.

The growth of the English language is marvelous. Authorities say that in the year 1794 the habitual users of English did not number over 15,000,000 people. In 1892 those who spoke the English language habitually numbered over 105,000,000. At this rate of increase at the end of the present century not less than 120,000,000 people will use the English language in their every day conversation. If the ratio prevails at least 840,000,000 of people will speak the English language at the close of the next century. It is the language of commerce and besides those who use it in ordinary conversation there are millions in China, the East Indies and Africa who use it in business transactions.

Telegraphic Notes.

Two thousand mill employees struck yesterday at Draught, Mass.

The President yesterday nominated Henry J. Berry to be postmaster at Reno, Nevada.

Senator White of Louisiana yesterday assumed his duties as Associate Justice of the Supreme Court.

In the Pollard-Brockenridge case at Washington yesterday all ladies not witnesses were excluded from the court room.

Philip D. Armour denies the published report that he intends giving \$500,000 to found a manual training school in San Francisco.

The Indian appropriations of the Government for the ensuing year will probably be a million dollars less than last year's appropriation.

The engagement of Minister Lorin Thurston and Miss Harriet W. Potter is announced. Miss Potter until about two weeks ago was employed as cashier of the Hawaiian exhibit at the Midwinter Fair.

A New York policeman early yesterday morning captured one of two suspicious looking men who were carrying a bundle. The other escaped. An examination of the bundle showed it contained dynamite bombs.

Chancellor Caprivi of Germany has submitted a proposal to coin 11,000,000 marks in five-mark pieces, 7,000,000 marks in two-mark pieces and 4,000,000 marks in one-mark pieces. The proposition is made because of an increased demand for silver and on account of the fact that silver coinage has fallen 22,000,000 marks below the authorized limit.

Queen Lilioukalani was interviewed at her home in Honolulu by a New York Herald reporter. She declared that although she had a deep personal interest at stake in the restoration of the monarchy, yet it grieved her most to think of the native population under the new regime. She said that the people of Hawaii were as free under the monarchy as were the people of the United States, and that among them tramps and strikes were few indeed. She, however, discouraged the idea of people from this country going there in the expectation of finding work as every avenue was overcrowded.

NEWLANDS ON THE SITUATION.

He Believes Nevada Should Maintain the Silver Organization.

Congressman Newlands has written the following letter to the *Walker Lake Bulletin*, which he desired published in that paper in connection with his letter to the *Washington Post*. Both appear in the *Silver State*, but as Mr. Newlands' letter to the *Post* has heretofore appeared in the *JOURNAL* it is omitted:

CHRYSE CHASE, Md., Feb. 9, 1894.

A. J. McCarthy, Esq.—DEAR SIR:—In reply to your letter inquiring as to the maintenance of the Silver party organization in Nevada I inclose herewith a letter recently sent to the *Washington Post*, which gives my opinion as to the position Nevada should hold regarding pending policies.

I do not see how Nevada can identify herself with the Republican party so long as that party persists in being a sectional party, representing practically only the interests of the New England and Middle States as manufacturing and creditor States.

I do not see how Nevada can identify herself with the Democratic party so long as that party allies itself with New York and allows it to dominate its financial policy.

I do not see how Nevada can afford to identify herself with the Populist party so long as that party remains wedded to impracticable theories, continues under weak leadership and for these reasons exhibits only waning strength.

Until changes take place which will warrant our identification either with one of the existing parties or with some new national party, which will believe in a strong American policy on the financial and industrial questions and will embrace the independent minds of the country, I believe it to be the true policy of Nevada to maintain her independent Silver organization and that her example should be followed by all the other mining States.

Very sincerely yours,
(Signed.) FRANCIS G. NEWLANDS.

School Teachers.

Professor Ring, State Superintendent of Public Instruction, says he receives dozens of letters from various parts of the United States from persons desiring positions as school teachers. He says there are only positions for 265 teachers in the State and there are about 450 residents of the State who hold teachers' certificates. As preference should be given home teachers, other things being equal, there is no opening for an outside teacher in Nevada at the present time.

West Point Cadetship.

Thomas C. Buttery, the young man appointed by Congressman Newlands for the West Point cadetship, took his examination last week at the Presidio and passed physically, and is confident that his papers upon the rest of his examination will be all right. They will be examined at Washington and he will receive definite information about the first of the month.

Jim Sullivan of the Russ House received last evening a telegram from Rye Patch, Nevada, stating that the sheep shearers there have struck for six cents and board—five only and board being offered. Telegrams are being sent in every direction warning the fraternity of the shearers of the strike and requesting them to remain aloof till wages are allowed at a living rate.

A CAMPAIGN OF DECEPTION.

Ex-President Harrison's Remarks Criticized by Senator Stewart—Truth Makes Harrison as Bad as Cleveland.

EDITOR JOURNAL.—The wickedness of Cleveland's administration has relieved the administration of President Harrison from the odium of being the worst in history. The denunciations of Cleveland on account of the want and misery he has produced the ex-President regards as laudation of himself. A few days ago in a public speech he told the people of Indiana that the hard times resulted from a Democratic threat to revise the tariff. On the twenty-eight of December last he told the people of Trinidad, Colorado, that "There are clear indications now in England and in Germany of the effects of the scarcity of gold and its prostrating effect upon their industries." He did not tell the people of Indiana or Colorado why the scarcity of gold does not produce the same effect in the United States that it does in Europe, nor why a common cause does not produce common effect throughout the civilized world.

Why did he find it necessary to ignore the fact that gold contraction is ruining the country by the absurd pretense that a more threat of tariff legislation was the cause of the scarcity of money and hard times? The answer is easy. To have admitted the truth would have made him as bad as Cleveland. They are both gold standard contractionists, faithful servants of an alien gold syndicate located in London, with a branch in New York. He dare not accuse Mr. Cleveland of his real offense, because such accusation would be his own condemnation. It would not do for either of the two men who inaugurated and executed a policy which brought on a panic and sent misery to every household in the land to call attention to the wicked deeds of the other. In his Trinidad speech he said:

Now I say to you what I said when I was President, and what I have always believed, that a larger use of silver for money and free coinage of silver upon a basis to be agreed upon that would maintain its parity with gold, was good for the whole world. I do not believe we could run free coinage ourselves, while the European governments were pursuing the policy they have been pursuing with silver, but there are clear indications now in England and in Germany of the effects of the scarcity of gold and its prostrating effects upon the industries. I believe these two great countries are nearer right to-day than they have been for the past twenty years.

What consequence is it whether Mr. Harrison believes in a larger use of silver for money or not, if he does not believe the United States has power to coin and use silver as money? Why does he not believe that we could run free coinage ourselves without the aid of foreign governments? Does not the Constitution authorize and require the United States to do that very thing, and have we not mints erected for that very purpose? What does he mean by coinage "upon a basis to be agreed upon that would maintain its parity with gold, was good for the whole world?" What have we to do with parity? What we want is money which will be on a parity with justice; money which will maintain the stability of prices. Bimetallism is not the result of parity between the two metals, but parity always has and always will result from bimetallism. The quantity of the two metals which can be coined into a given number of dollars will have the same market value. If either is more abundant than the other, or more easily acquired, it will be used until the other becomes more abundant or more easily acquired. The fact that gold and silver were equally convertible into money during all the ages previous to 1873 made them equally desirable and maintained the parity. If silver is now more abundant than gold, and the United States will open her mints, we will have the best of all the world until gold becomes the plentier metal.

But I did not commence this letter with a view of arguing the silver question. My object in writing is to call attention to the fact that ex-President Harrison is on another campaign of deception in the interest of the gold syndicate of New York and London. He was elected on a platform which declared that "The Republican party is in favor of the use of both gold and silver as money, and condemns the policy of the Democratic administration in its efforts to demonetize silver." He used the power and patronage of his office to prevent silver legislation. The Sherman act was extorted from him to save his administration from defeat on the tariff bill. He would not execute that act according to its letter or spirit, or in the interest of the American people. The Treasury notes issued in the purchase of 4,500,000 ounces of silver bullion per month made it discretionary with the Secretary of the Treasury to redeem them in gold or silver coin, but the third section provided that "he (the Secretary of the Treasury) shall coin of the silver bullion purchased under the provisions of this act, as much as may be necessary to provide for the redemption of the Treasury notes herein provided for." President Harrison refused to coin and pay out silver in redemption of Treasury notes as provided in the act of 1890, or to use silver as money in any form so long as foreign syndicates desired gold for export. France and Germany with the same discretion to redeem their obligations in either gold or silver and without a mandatory law compelling them to coin silver for such redemption refused to pay out gold for export. It was the conspiracy between the Harrison and Cleveland administration and the gold exporters which depleted the Treasury and

brought on the panic. It was the combination between Gladstone's and Cleveland's administrations and the New York and London gold syndicate which suspended the coinage in India, forced the repeal of the Sherman law, and filled the civilized world with misery and starvation. It took patronage as well as moneyed influences to secure the co-operation of the majority of the Democrats in the two Houses of Congress, while the Cleveland gold policy was eagerly sustained by nearly unanimous vote of the Republicans in both Houses. The gold ring had the Republican leaders and had used them for years, and when the syndicate acquired Cleveland, it secured the Democratic party.

Fortunately a third party was organized and cast more than a million votes in 1892, and now forms a nucleus around which the people may rally and rescue the country from the grasp of gold contraction and the rule of the money powers. Every effort will be made by the Republicans of the North to insult the South and keep it solid for Democracy, and every effort will be made to keep the North solid for the Republicans by misrepresenting the South and the West. Inconsequential and worn-out issues will be brought to the front to deceive the people and prevent the success of the third party in its uprising for liberty. Although the policy of Cleveland's administration to demonetize silver made Harrison President, and although the redoubled efforts of Cleveland to serve the gold combination may for the time have made people forget the efforts of Harrison in the same direction, the fraud is at last exposed. The real cause of hard times has been discovered. The perpetrators of the wrong are known. The time is past for any gold standard contractionist to gain popularity because some other gold standard contractionist is worse than he is.

Ex-President Harrison's electioneering campaign will call attention to his efforts to demonetize silver when President, and will not benefit him. He may relieve Mr. Cleveland from some of the odium of paralyzing the industries of the United States by reminding the people that he and Mr. Cleveland are jointly responsible for the distress of the country. Yours, very truly,

Wm. M. Stewart.

CARSON VICTORIOUS.

The Guard Team Wins the First Prize at Shell Mound.

The Carson Guard shooting team won the first prize at Shell Mound, San Francisco, last Sunday. They not only beat the crack marksmen at the Midwinter Fair tournament, but all previous records for the same number of men with military rifles. The *Tribune* says when the news was received at Carson the town went wild with excitement. Cheers and congratulations were the order along the line, and in the evening the younger members of the Guards fired a salute of 43 guns, while the drum corps beat the notes of victory.

The total score of the Carson team was 443, and the scores of the California teams 439 and 425 respectively. The Carson team won the first prize of \$150 and champion medal.

AN ATROCIOUS MURDER.

An Old Lady Butchered in Antelope Valley.

Last Thursday afternoon Mr. and Mrs. Howell called at the residence of Mrs. Adeline Eggleston, who lived alone on her farm in Antelope Valley, Mono county, California. They knocked at the door and receiving no reply went to the back door, and looking through the window saw Mrs. Eggleston lying on the floor and upon entering the house saw that she had been murdered. Her head had been crushed with a hatchet, and her neck and body showed that she had been stabbed in twenty-five places, and a lard can placed on her head. The floor and walls of the kitchen were splattered with blood, and a bottle half filled with whisky was on the table.

Mrs. Eggleston was 65 years of age and she lived alone on the ranch, her nearest neighbor being a half mile distant. The body was brought to Carson for interment beside her husband, who died in 1890.

The Carson papers say various theories are advanced regarding the murder, but as Indians were seen about the house it is believed that they committed the deed. A gold watch and some other valuables were left undisturbed, indicating that robbery was not the motive for the murder. The *News* says many incline to the belief that a white man or woman committed the atrocious deed. It is not probable that Indians were the murderers as they would not have left a bottle half filled with whisky on the table.

THE SHEEP BUSINESS.

It Is Among the Best in Nevada.
The *Silver State* has the following relative to the sheep business in Nevada:

"There is more inquiry for sheep by buyers who are in or contemplate going into that business than there has been for the past several years. It is the only industry that the contraction of the currency has not fatally crippled in this State. Although the price of wool has been falling for years, the wool growers are about the only ones engaged in our varied industries who have withstood the financial depression. A very industrious and intelligent gentleman, who has been in the business in this country for only three years, informs us that if he can get 10 or 12 cents a pound for wool for the next four or five years he will be willing to quit the business, go back to the old country and live a lord the balance of his days."

EVANGELIST MEETINGS.

Large Audiences at the Opera House.
Charles N. Crittenton, the Millionaire Evangelist, held services three times last Sunday and once yesterday at the Opera House. He is an earnest advocate of the cause of Christianity and as he preaches and travels at his own expense there can be no doubt of his sincerity. He preaches the doctrine of the scriptures and quotes from the Bible in support of all he says and asks. Large congregations have attended all of his meetings and he is converting many to the cause to which he is devoting his life. He does not ask the people to unite with any particular church, his efforts being directed to getting them to profess religion and associate with the church of their choice.

Trustees Elected.

The annual meeting of the stockholders of the Reno Real Estate and Investment Company took place last evening in the office of the First National Bank. The affairs of the company were reported to be in a prosperous condition. The old Board of Trustees were re-elected with the exception of George H. Turrittin, who declined, and Dr. J. A. Lewis was elected in his stead. The Board consists of John Sparks, C. C. Powning, A. G. Fletcher, J. A. Lewis and C. T. Bender.

BREVITIES.

W. H. A. Pike of Wadsworth visited Reno last evening.

Tim Dempsey, the popular Carson saloon man, has closed his business in that city and arrived from Carson Sunday evening on his way to San Francisco where he has purchased of Jno. C. Donnelly an interest in "The Osborn," No. 210 Grant Avenue. Mr. Dempsey will be pleased to see all Nevadans who may be visiting in the city. The *Journal* will always be on file at "The Osborn" so that the latest Nevada news can be had at all times.

John Sunderland, the leading tailoring and boot and shoe establishment in Nevada, has a new advertisement in this morning's *JOURNAL*. His stock is the largest and most complete. He has in addition to a fine assortment of ready made clothing an extensive variety of cloths for gentlemen's suits, which he makes to order in the most fashionable styles and at reasonable prices.

Henry J. Berry of the firm of Berry & Novacovich has been appointed Postmaster to succeed H. P. Krause, our present Nasby, whose term expired some weeks ago. There were several candidates for the position, some of whom were endorsed by the "White Wings" and bolting members of the Democratic State Central Committee. Mr. Berry is a good businessman and will doubtless fill his new position with credit to himself and satisfaction to the public.

Instructions in French.

Madame Bonneville Leak, at the Golden Eagle Hotel, teacher of the French language, would be pleased to enlarge her class and respectfully solicits patronage in Reno. Mrs. Leak is a qualified and highly successful teacher of the French language, which is her native tongue, and the experience she has acquired in the many years she has exercised her profession enables her to offer her services to the public of Reno as a thoroughly competent instructor.

Terms—Children between six and ten in class per month, \$1.50; children between ten and fifteen in class per month, \$2.00; adults in class per month, \$4.00. Private instructions—Day and evening lessons, \$4.00 and \$6.00. mh7ml.
